

Unit is installed in the garage.

HOW DOES IT WORK?

THE BEST FEATURES OF THE SYSTEM:

- The reverse osmosis system comes with adjustable blending control valve which adds a little minerals back into the supply line, giving you great tasting water to your appliances and drinking faucets.
- Installed in the garage area reduces your liability insurance on the system
- Comes with a leak shut-off controller unit.
- Bigger tank more volume of water
- Booster pump 60PSI
