

WATER SOFTENING/
CONDITIONING SYSTEM

CHLORAMINE REDUCTION SYSTEM

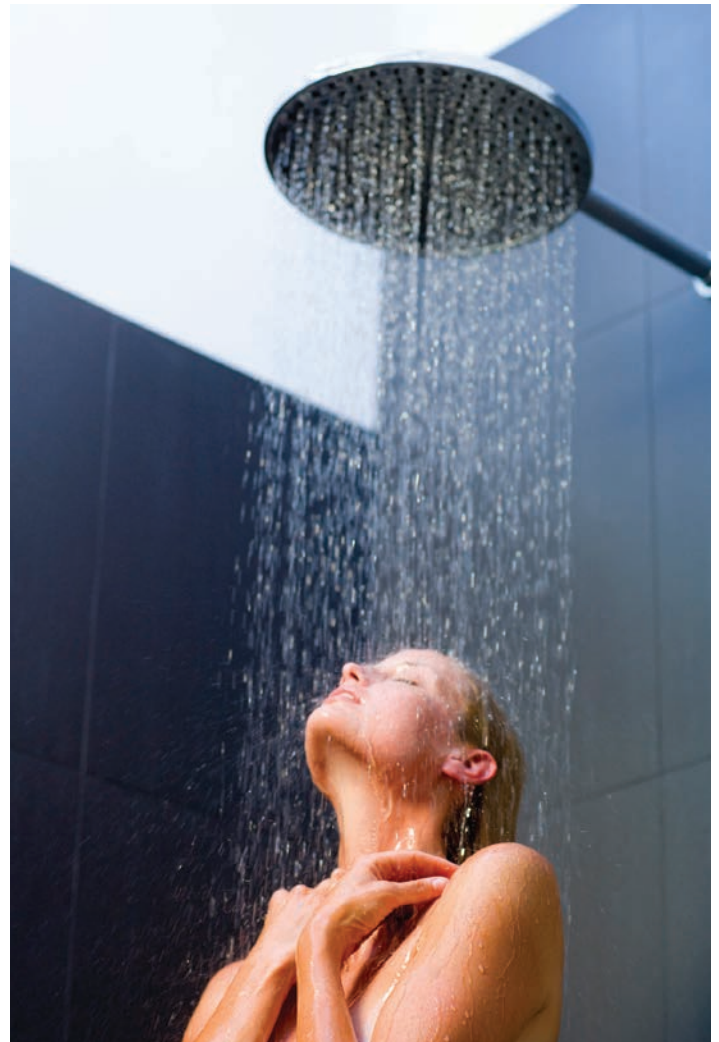

TREAT YOUR HARD WATER!

Water heaters, faucets, and shower valves are under attack from corrosion every single day!

The Purearth2o Water Softening/Conditioning System is designed specifically to reduce chloramines, chlorine and volatile organic compounds (VOCs) and protect your plumbing system and appliances against scale deposits). The build-up of mineral deposits in your water heater, faucets, and shower valves is a costly problem, particularly in hard water areas where water contains large amounts of magnesium and calcium carbonate. Mineral deposits will start to form corrosion the minute your fixtures and appliances are installed.

There's an answer!

The Purearth2o Water Softening/Conditioning System provides the solution to residential hard water problems and has proven effective in removing mineral build-up on faucets, shower valves, and appliances. After it's installed, it goes to work on your existing scale as well, and with proper care, can keep all your plumbing, faucets, and appliances looking like new, and your countertops and shower doors spot-free – all with low maintenance!

YOU HAVE INVESTED A LOT OF MONEY IN YOUR FAUCETS AND APPLIANCES. PROTECT THEM!

BENEFITS

- Water feels softer and smoother on hair and skin
- Prevents spotting on your faucets, shower glass doors, countertops, glassware, and dishes
- Protects your faucets and shower valves from scale build-up
- Protects your appliances, potentially extending their lifetime

WATER SOFTENER: HOW IT WORKS

Water flows through the KDF media and catalytic carbon reducing chloramines, pesticides, and herbicides. Then it flows through the ion exchange media removing calcium and magnesium from your water.

Stage 1 KDF Media

KDF Media is designed to specifically reduce chlorine and hydrogen sulfide. It also controls scale build-up, bacteria, algae, and heavy metals in water while improving the life of other medias.

Certifications: NSF/ANSI Standard 42 and 61

Stage 2 100% Catalytic Activated Carbon

The chemicals reduced by catalytic activated carbon are chloramines, chlorine, hydrogen sulfide, and volatile organic compounds (VOCs). VOCs include pesticides, herbicides, and most solvents, tastes and odors.

Certifications: NSF/ANSI Standard 61

Stage 3 Resin Media

Media removes hardness caused by calcium carbonate and magnesium.

Stage 4 Quartz Media

Gives greater flow-rate throughout the entire filter system.

Soft Water Throughout Your Home

Decrease soap residue on faucets, shower doors, and dishes, improve the lifespan of your appliances, and enjoy the way soft water feels on your skin and hair!

WATER SOFTENING/ CONDITIONING SYSTEM

CHLORAMINE REDUCTION SYSTEM

600 Water Softening System

Sized for homes up to 3,800 sq. ft.

CONNECTION SIZE	1" x 1 1/4" brass connections
FLOW RATE	High-flow rate capacity up to 30 GPM
SIZE / WEIGHT	10"w x 62"h / 122 lbs.

800 Water Softening System

Sized for homes up to 7,800 sq. ft.

CONNECTION SIZE	1 1/4" x 1 1/2" brass connections
FLOW RATE	High-flow rate capacity up to 35 GPM
SIZE / WEIGHT	13"w x 64"h / 178 lbs.

900 Water Softening System

Sized for homes over 7,800 sq. ft.

CONNECTION SIZE	1 1/4" x 1 1/2" brass connections
FLOW RATE	High-flow rate capacity up to 35 GPM
SIZE / WEIGHT	14"w x 68"h / 190 lbs.

Manufactured in the USA
